CHANGELA VIVEK VIMALBHAI

+91 9328253710 ⋄ vivekchangelawork@gmail.com

OBJECTIVE

Aspiring Software Development Engineer with hands-on experience building full-stack web applications, RESTful APIs, and AI-powered systems using Java, Python, React, Flask, and SQLite. Passionate about designing scalable technology solutions, solving real-world engineering problems, and currently strengthening backend development expertise with Java Spring Boot and cloud technologies.

EDUCATION

Bachelor of Technology in Computer Science Sept 2023 - June 2027
Vellore Institute of Technology - AP
CGPA: 8.14/10

SKILLS

Languages	Java, Python, C++, JavaScript, SQL
Frontend	React, HTML5, CSS3, Tailwind CSS, Vite, Framer Motion
Backend	Flask, Node.js, REST APIs, SQLAlchemy
Databases	SQLite
AI/ML	PyTorch, OpenCV
Cloud & Tools	AWS Certified Cloud Practitioner, AWS Academy Cloud Foundations, Git, GitHub, VS Code

PROJECTS

Otolith Analysis and Classification System

- Developed an end-to-end AI-powered biological classification system using React, Flask, PyTorch, and SQLite for automated prediction of 14 fish species.
- Designed RESTful APIs connecting the React frontend with the Flask inference engine, enabling seamless image upload, prediction, and research data management.
- Built a persistent SQLite database to manage research datasets, prediction history, and application records while supporting scalable data handling.

URRJA: P2P Solar Energy Trading Platform

- Developed a full-stack peer-to-peer energy trading platform using Python Flask, SQLite, HTML5, CSS, and JavaScript for localized microgrid energy exchange.
- Designed RESTful backend services to manage energy listings, execute marketplace transactions, and maintain real-time trading records.
- Built an interactive dashboard enabling users to monitor energy surplus, manage listings, and perform efficient marketplace transactions through a responsive web interface.

Strand Craft

- Developed an online bracelet customization platform with dynamic product visualization and configurable design options.
- Implemented efficient state management to provide real-time visual updates while synchronizing user selections with structured application data.
- Designed reusable frontend components to improve maintainability and deliver a seamless product customization experience.

Pixel Cursor

- Developed a browser-based pixel editor for designing custom mouse cursors with configurable 32×32 and 64×64 Hi-DPI canvases.

· Implemented pixel snapping, flood-fill, and dual-state cursor generation to improve editing precision and export-ready asset creation.
· Optimized rendering logic to deliver smooth interactions and accurate cursor generation across supported operating systems.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Academy Graduate – Cloud Foundations

POSITION OF RESPONSIBILITY

Marketing Team Co-Lead Jul 2024 - Oct 2024
Entrepreneurship Club, VIT-AP

· Coordinated marketing campaigns and collaborated with cross-functional student teams to increase participation in entrepreneurship initiatives.
· Assisted in planning promotional strategies, event outreach, and social media campaigns.

Event Management Team Member Sept 2023 - Apr 2024
Blockchain Community Club, VIT-AP

· Coordinated logistics and event execution by collaborating with organizing teams to ensure smooth event operations.
· Supported planning and management of technical events while maintaining effective communication across teams.
